

Ruger American

In 2022, Ruger made a change to the bolt lock pin in all Ruger American® rifles. We have updated our trigger housings to reflect this change, however, if you own an older rifle model a modification may be necessary. Follow the tech tip below for the bolt lock pin modification:

- The "nub" on the bolt lock pin on the original factory trigger can be shaved off through the use of a Dremel, file, or similar.
- Simply use your Dremel, file, or similar to carefully shave off the excess material on the bolt lock pin until it can easily fit into the housing
NOTE: Please be aware: you are modifying a part of your rifle, exercise EXTREME caution while performing this job
- If you do not feel comfortable modifying your rifle part or you have any questions, please contact our technical support experts. We will be happy to assist you 7am-3pm (MST) Monday-Friday.

"Failure to comply with our installation instructions and improper installation of this trigger can result in severe bodily harm or death. By purchasing this product, you agree to our disclaimer."
