## DANIEL DEFENSE M4s Mil-Spec+ Masterpieces

Display Until February 6, 2012

## PRI M84 GAS BUSTER CHARGING HANDLE

**Precision Reflex, Inc.**, has developed the M84 Gas Buster charging handle for AR-type weapons. Featuring "The Big Latch," the M84 increases safety by inhibiting harmful blowback gas and oil particles from striking a shooter's face or glasses. The M84 Gas Buster charging handle with the new combat latch is 17 percent larger

than the military latch; plus it has a flat rippled front for a better grip. Suggested retail is \$89.95. **Contact [precisionreflex.com](http://precisionreflex.com) or 419-629-2603.**

**" Just around the next corner is a groundbreaking improvement, and when it comes to weapons systems, nothing could be more important. "**

## SAMSON GRIP POD

**Samson's Grip Pod** is a revolutionary new vertical foregrip integrated with a strong and stable bipod. The Grip Pod's legs deploy at the push of a button. It offers a combination of advantages never before available in a single accessory. Samson considers the Grip Pod to be an enhanced target acquisition system (ETAS). Using the Grip Pod, an operator can go from a CQB position to a prone one, and have a stable base for aimed firing in place before hitting the ground.

The Grip Pod is manufactured from aerospace materials to exceed military specifications. It mounts directly to Picatinny rail systems and additional mounting options will be available soon. The GP is currently in worldwide use with select special forces units including: U.S. Navy Seals and EOD, U.S. Army, U.S. Army Special Forces and designated marksmen, USMC, U.S. SOCOM, FBI HRT and other government entities. The Grip Pod has been selected for use on U.S. Army Designated Marksman rifles, and it is part of the down-select for the SCAR (SOF Capable Assault Rifle) project.

Stronger than conventional vertical grips and smaller than non-integrated solutions, the Grip Pod measures 5.75 inches closed, 8.25 inches deployed and only weighs 7 ounces. Suggested retail is \$169. **Contact [samson-mfg.com](http://samson-mfg.com) or 888-665-4370.**

## TIMNEY AR-15 SKELETONIZED TRIGGER

**Precision shooting** demands a precision trigger. You can replace a stock AR trigger with the easily installed Timney AR-15 Skeletonized trigger system, which breaks smooth and crisp. The trigger is factory preset with a pull weight of either 3, 4 or 4.5 pounds. Installation is quick and no adjustments are necessary—this is a 100 percent true drop-in trigger. The trigger module installs using your rifle's original hammer/trigger pins and the proprietary design eliminates pin rotation and walkout. Timney Triggers, the oldest and largest trigger manufacturer in the world, has been making replacement triggers since 1946 and is considered among the finest manufacturers of AR replacement triggers. Suggested retail is \$269.95. **Contact [timneytriggers.com](http://timneytriggers.com) or 602-274-2999.**
